Graham Champion Labor Compliance and Construction Contracts Supervisor

Mr. James Cox, P.E. ENGIE Services U.S. 201 Lomas Santa Fe Drive, Suite 480 Solana Beach, CA 92075 VIA EMAIL ONLY james.cox@engie.com jbrown@engie.com

Dear Mr. Cox:

Subject: PS18-0281-06 – Design and Construction of Solar Power Generation Systems at District Sites (SDUSD Project 93400075.1)

Notice to Proceed: No 07 -Kearny High School Construction of Solar Photovoltaic System

This letter constitutes your notice to proceed for construction work at Kearny High School per your attached proposal with the scope of work breakdown dated May 31, 2019, for the not-to-exceed amount of \$1,035,177.42.

Work shall begin on July 12, 2019, and is to be completed by December 16, 2019.

Correspondence for this NTP is to reference <u>Agreement PS18-0281</u>; <u>NTP 07</u>; <u>Project 9340075.1</u>. In addition, invoices are to have a unique ENGIE invoice number.

Original invoice should be sent to:

San Diego Unified School District PPO Center, Attn: Catherine Bendixen 4860 Ruffner Street San Diego, CA 92111

Invoicing inquiries should be directed to Catherine Bendixen at (858) 637-6246.

Please call your construction manager if you have any questions regarding this NTP.

Sincerely,

Graham Champion

Labor Compliance and Construction Contracts Supervisor

Re: Proposal for Photovoltaic System at Kearny High School

Dear Mr. Beltran,

We are pleased to submit this proposal to obtain construction Notice To Proceed (NTP) for the Photovoltaic canopy system at Kearny High School. This proposal includes all material, labor, & equipment required to perform the following:

Scope of Work

- Provide, Install, & interconnect a 236.7kw DC Solar Canopy Structure, with an annual energy output of 414.3 MWh per year, as requested by the district.
- Provide and install all inverters, transformers, disconnects, metering equipment, distribution equipment, and balance of systems components as needed to complete and operate the system.
- Install temporary fencing, portable bathrooms, hand wash station, and Best Management Practices (BMPs).
- Perform all trenching, directional boring, as needed to install system.
- Provide & install spare EV Charging conduit per plans.
- Provide & install spare Security camera conduit per plans.
- Restore, to original conditions anything damaged during construction, including all: landscaping, asphalt, concrete, parking-lot striping, curbs, and masonry.
- Re-stripe non-compliant ADA parking stall, Demo non-compliant ramp and install new truncated domes,
- Perform commissioning and NETA testing of the PV System and electrical components per SDUSD approved specification and RFP documents
- Perform 2 years of Extended Commissioning of the PV System per RFP documents.
- Deliver 2 years of Performance Guarantee (PEGU) of the PV System per RFP documents.
- Installation to comply with Division of State Architect (DSA) approved plans, SDUSD approved specifications, & RFP documents.

During design development, several things have changed from the initial bid that must be accounted for in the final Construction NTP amount. The following is a summary of those items.

System Size Reduction

The original target solar PV production listed in the RFP was 457.0 MWh per year. Due to new
energy efficiency measures discovered in design development, the annual target for PV solar
production was reduced to 413.3 MWh. This reduced system size results in a credit to the district
for material and installation costs of (90) solar modules, (1) inverter, and associated structure.

DSA Required Design Changes

 During the Bid process, it was anticipated that design NTP would be issued in time to utilize the DSA approved canopy pre-check. However, during contract negotiations it became clear that the design NTP would not be issued until after new DSA regulations would take effect. The result of these changes is an increase to the material & labor cost of the system. The cost impact of these changes could not be calculated at the time of contract, therefore they were excluded from our Best And Final Offer (BAFO) and noted in the contract.

• During the DSA plan check, some deficiencies to the existing Americans with Disabilities Act (ADA) path of travel were noted. While these upgrades need to be corrected in-order to obtain approval on the new PV System, they are existing deficiencies not related to the new PV system, and were not noted in the RFP documents. These upgrades were not anticipated to be needed during the bid or design development phase and therefore not included in the bid. These changes include: Install (1) new sign, Demo of existing concrete ramp & installation of (2) truncated domes, cut curb and install 20' of new concrete curb, and correct/re-stripe a non-compliant ADA Parking space.

Steel Tariffs

At time of bid, no steel tariffs were in effect. Since then, the U.S. Government has levied tariffs on steel which have had a significant effect on the canopy material costs. Cost impact due to steel tariffs were excluded from the bid and noted in the contract.

Please review the following accounting of these changes. Backup documentation to be supplied separately. Thank you for the opportunity to provide this proposal.

Sincerely,

James Cox

Task Order Description

Description: Provide all labor, material and equipment for the construction of the Solar PV canopy structure, a Design Build Turnkey Project, at Kearny High School per DSA approved drawings # 04-118393 dated 4/25/2019, all relevant CCDs, RFIs, SDUSD Project Specifications submitted on 5/24/2019, WPCP, Construction Schedule dated 5/28/2019 and the Construction Management Plan. Price to include the installation of a solar photovoltaic system at Kearny High School, PV panels, associated DC and AC wiring, switchboards and new main switchgear per the approved DSA drawings and in accordance with the SDUSD project specifications. The photovoltaic panels are installed over parking spaces near the northeast corner of campus. The panels are mounted on a steel frame, creating new shaded parking and pedestrian canopies with LED lighting. The system is a renewable power source with an annual estimated production of up to 413.3 MWh of electrical energy. The A2 year extended commissioning period and PeGu will be provided beginning after the completion of the Engie performance validation period.

Justification: Scope and terms are in accordance with contract PS18-0281-06
