

Marshall Elementary School

3550 Altadena Ave.
San Diego, CA 92105

① Synthetic Turf Field

Marshall Elementary is located in the residential community of City Heights along Altadena Avenue and has approximately 500 student enrollment. Almost all of the students are residents of City Heights and reflect the multicultural neighborhood surrounding the campus. About 91% of the students speak another language other than English.

Marshall was built as a neighborhood school to accommodate approximately 250 students. However, as the population grew in the community, the school needed more classrooms to accommodate the increase in enrollment. The campus consists of seven permanent buildings and 26 portable classroom buildings. The remaining part of the campus is set aside for physical education with a new synthetic turf field, asphalt playground with play structures, parking lot and a new student drop off location.

Marshall Elementary School Synthetic Turf Field

Completed: May 2016
Funding: Proposition Z

The existing decomposed granite play field was replaced with a 28,800 square foot synthetic turf field surrounded by an asphalt running track. The students will use this new field for physical education and other activities. Additional improvements included grading and irrigation installation for cooling and cleaning purposes.
