

# Silver Gate Elementary School

1449 Venice Street  
San Diego, CA 92107

Sub-district: C  
Cluster: Point Loma  
Year School Opened: 1952  
Grades: K-4

- ① New Synthetic Turf Field
- ② Ramp and Accessibility Improvements

Silver Gate Elementary is located in a residential neighborhood of the Point Loma community. The neighborhood is economically and ethnically diverse. The student enrollment of approximately 570 represents this well. The school is in the heart of Point Loma and has a strong community that supports a positive learning environment.

When the school was built in 1952, the campus consisted of six main buildings for classrooms, administration offices, a multipurpose room with kitchen and two oversized kindergarten rooms. With the growth of the community, there was a need to build another classroom building in 1958. Over the years, five portable classrooms have been added again to accommodate a growing student enrollment. In 2004, a library building was added and funded by Proposition MM. The total facility square footage is 48,237. The campus also has two shaded lunch courts, an asphalt playground with play structures and a synthetic play field for physical activities.

## New Synthetic Turf Field

Completed: December 2016  
Funding: Proposition Z

The existing decomposed granite play field was replaced with a 27,832 square foot synthetic turf field surrounded by a running track and with two soccer field markings. The students will use this new field for physical education and other activities. Additional improvements included grading and irrigation installation for cooling and cleaning purposes.
